

講演タイトル: **Transformations of Porphyrinoids
Triggered by Coordination**

*Department of Chemistry,
University of Wrocław, 50-383 Wrocław, POLAND*
Prof. Lechosław Latos-Grażyński

日時: 11月24日 (水) 15:15 ~ 16:30
場所: 総合B棟0110公開講義室

講演概要:

Transformation reactions of core-modified porphyrinoids, which are triggered by metal-insertion, are reported. For example, insertion of boron(III), silicon(IV) or phosphorus(V) into an N-confused porphyrin causes pyrrole inversion followed by a fusion step to give an N-fused porphyrin derivative. The inner core reactivity of carbaporphyrinoids and metallocarabaporphyrinoids is also discussed.
