

# Supramolecular Chemistry Seminar

## Dr. Guzman Gil-Ramirez

(University of Lincoln, UK · Senior Lecturer)

September 30<sup>th</sup> (Fri), 14:00~15:00

Room: Adv. Res. Build. B 0110 (総合研究棟B 0110室)

### A personal journey in self-assembly: porphyrins, knots and lanthanides.

In this talk I will give an overview of my research interests, spanning from fullerene receptors based on porphyrins to the use of Lanthanide metals as templates to obtain molecular knots and other supramolecular chiral assemblies and the study of their chiroptical properties.
